Amber Shield C800 Device Summary

The Amber Shield C800 is a Bluetooth-enabled keyfob designed as an intelligent accessory to Amber Connect's LTE-enabled telematics devices. Compact, robust, and easy to use, the AHC800 enhances your vehicle's security and user experience by integrating seamlessly with your Amber Connect system.

When paired with your LTE device, the Amber Shield C800 adds an additional layer of functionality and convenience. Its advanced features enable real-time alerts, vehicle control, and smart trip classification, making it an essential tool for modern vehicle owners.

Scope

These instructions apply to the following models:

- Amber Shield C800_GB01

Features

Defence Mode Activation (ON/OFF)

Allows users to turn Defence Mode on or off, enhancing vehicle security when needed.

Vehicle Immobilisation Control (ON/OFF)

Enables remote control over vehicle immobilisation (if installed), helping prevent unauthorised movement.

Early Warning Notifications

Alerts the user if the vehicle moves without the keyfob present, providing an added layer of security.

Wireless SOS/Panic Function

Allows users to send an SOS or activate the panic alarm when in Bluetooth range of the vehicle, enhancing personal safety.

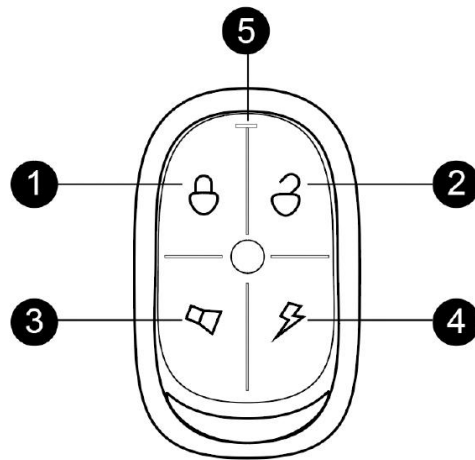

Trip Classification (Business Mode)

Allows users to classify trips as "Business" through a button press on the keyfob, simplifying expense tracking.

Vehicle Finder with Buzzer Activation

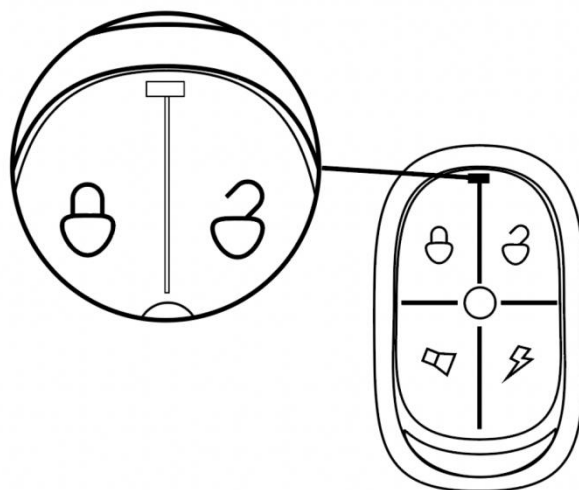

Assists users in locating their vehicle by activating a buzzer if installed, ideal for crowded parking areas.

Product Description

1. **Button A:** Button for defence mode ON and engine disable
2. **Button B:** Button for defence mode OFF and engine enable
3. **Button C:** Long press for SOS/Panic alert
4. **Button D:** Custom button for features such as classification of the trip and finding parked vehicle
5. **LED Indicator**

Self Check

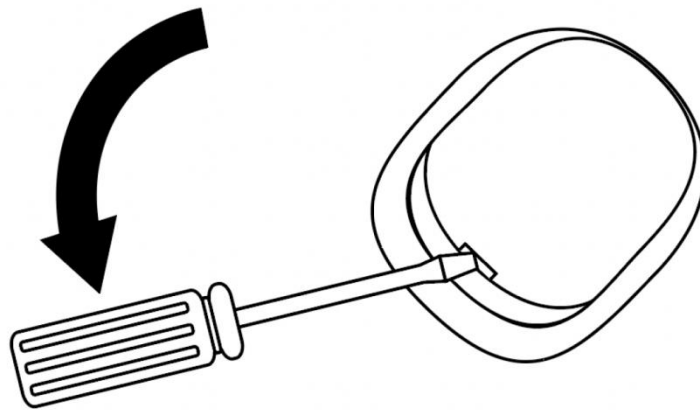

When the device is operating correctly, the LED will light up when the button is pressed.

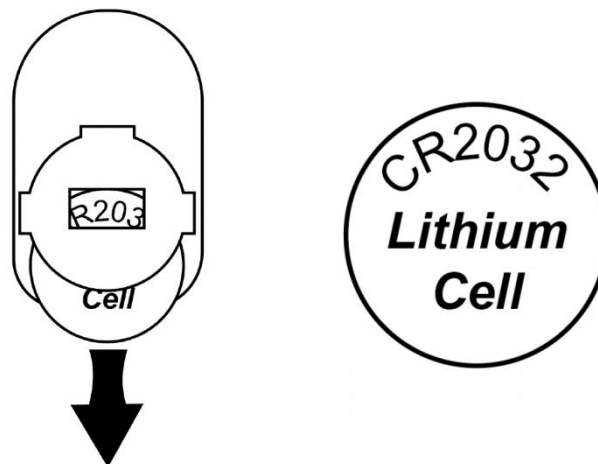

If the indicator does not light up, the device may have low power. Please replace the battery following the instructions below.

Battery Replacement

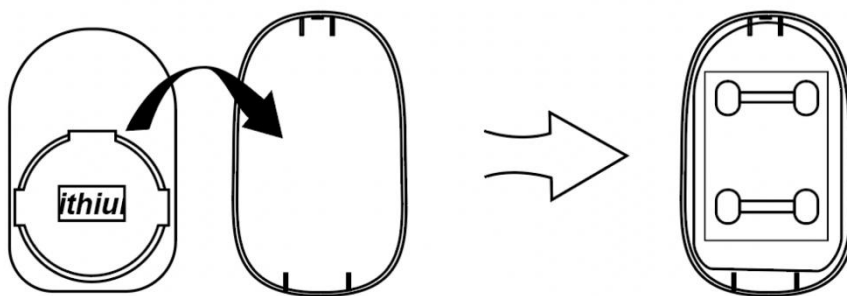

To replace the battery, follow these steps:

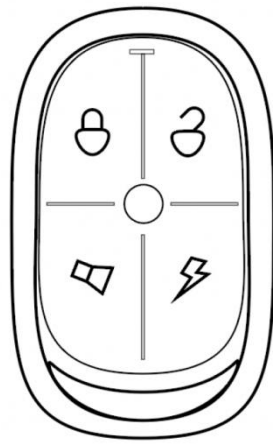

- Locate the small notch on the back of the unit near the lifting ring. Use a small flat-head screwdriver to carefully pry open the back cover.

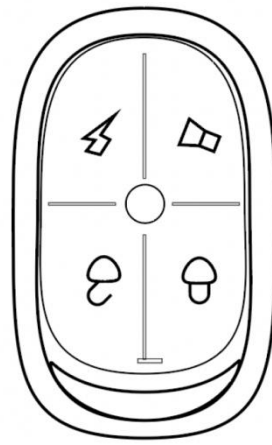

- Remove the old battery and insert a new CR2032 Lithium battery. (Note: Only CR2032 Lithium batteries are compatible with this device.)

- Place the back cover back onto the device, ensuring the battery is facing down and the buttons are facing up. Press the cover firmly to secure it in place

Correct

Incorrect

- If the cover does not close properly, check that the battery and buttons are positioned correctly.
